

## Attachment A – Study Course’s Council 29th November 2023

[A] Base	Arithmetic average of all compulsory courses plus grade obtained from the arithmetic average of every elective course chosen and passed		
[B] Thesis evaluation (max 7 points)	Type of thesis		
	Quality of research		
	Quality of presentation		
	Mastery of the topic		
[C] Bonuses (max 7 points)	Discussion skills		
	Quality of the presentation	max	1 point
	Mastery of the subject	max	1 point
	Degree during the June/October session		4 points
	Degree during the March session.		2 points
	Number of laudes: 0.3 for each laude until a maximum of		3 points
	International exchanges: from 0 to 1 point in relation to the number of exchanges, their duration, the results	max	1 point
	Taking part in extra-curricular didactic activities.		0.25 for every 4 courses/conferences in presence and related;
	0.25 each voluntary frequency at public facilities with a minimum number of frequency of 80 hours duly documented;		
	0.25 volunteer activities duly documented		

The overall grade, determined by the sum of the grades foreseen by items a + b + c, is rounded only after the final sum to the nearest whole number, from 0.5 downwards, from 0.6 upwards. Candidates who have achieved a final grade greater than or equal to 113 can be awarded with “laude” with the unanimous opinion of the members of the commission.

<b>Experimental thesis</b>	①	Fundamental research studies using theoretical or concrete lab techniques.
	①	Clinical and epidemiological studies of operations.
	①	Observational-type clinical and epidemiological studies (across the board, lengthwise, case-control) integrated by: study protocol, data gathering and adequate statistical analysis.
	①	Retrospective observational studies on series of patients chosen from the hospital and/or clinic with proper statistical analysis and a documented study protocol.
		The number of the sample must be adequate.
	①	Analysis and systematic review of the literature with meta-analysis and production of quantitative results.
<b>Clinical records presentation thesis</b>	①	Clinical records presentation: clinical data description of a series of patients chosen from hospital and/or clinic background without statistical elaboration.
<b>Compilative thesis</b>	①	Analysis and review of the literature, also systematically, without statistical elaboration of the data and production of quantitative results.
	①	Case report: Description of the symptoms, signs, diagnosis, treatment and follow-up of one or more patients.
